

Innovative Concept Delivered

ISO 9001 : 2008

GO GREEN - CONSERVE ENVIRONMENT

INTRODUCTION

Since 1990, Monarch Consultant is engaged in civil construction business. We are civil construction contractors, specialized in constructing multi-storied residential, commercial and various industrial structures. We had successfully completed many buildings, small bridges and culverts and quality assured concrete works. We had also undertaken construction of road, drainage & other infrastructural development projects.

With a vast experience in the field of civil construction in Gujarat for more than 20 years, we have built our reputation through our excellent service and high standard of workmanship. Our expert team employs its experience and expertise in using modern equipments for better and reliable civil construction.

VISION

In the year 1990, our founder Mr. Ujamshi I.Khandla (B.E. Civil) established Monarch Consultant, initiating better use of his expertise and skills in civil construction. Monarch Consultant is a proprietor firm of Mr. Ujamshi I.Khandla.

Apart from Monarch Consultant he had also formed Monarch Group of Companies, which was organized and still efficiently managed by Mr. Ujamshi I.Khandla under his leadership.

"In the Year 2012 formed, MONARCH INDIA INFRACON PVT. LTD., MI IPL is expert in setup & establish of Solar Power Plant Projects"

INSCRIPTION

Construction of shelters to prevent from nature's impact is as old as human existence on earth. In ancient civilizations structures, roads and drainages were built, considering the habitation of mankind. Infrastructural development was an integral part of architecture in those days too. The building materials used for construction were stones and mortar to bear the load of huge palatial structures. These building materials had a considerable setting period for curing, as compared to scientifically developed building materials available today; which are almost instantly curable.

Today, the newly named Seven Wonders of the World are man-made structures built with ancient building materials. It is beyond one's imagination to discover from these wonders the age of civilizations and their incredible concepts. Construction had gained great significance in those ancient days to build lavish habitats for royal dignitaries. In the present days construction is a contemporary art and feat that delivers the conceptual transformations anew; resulting into endless creation of designs.

ACHIEVEMENTS

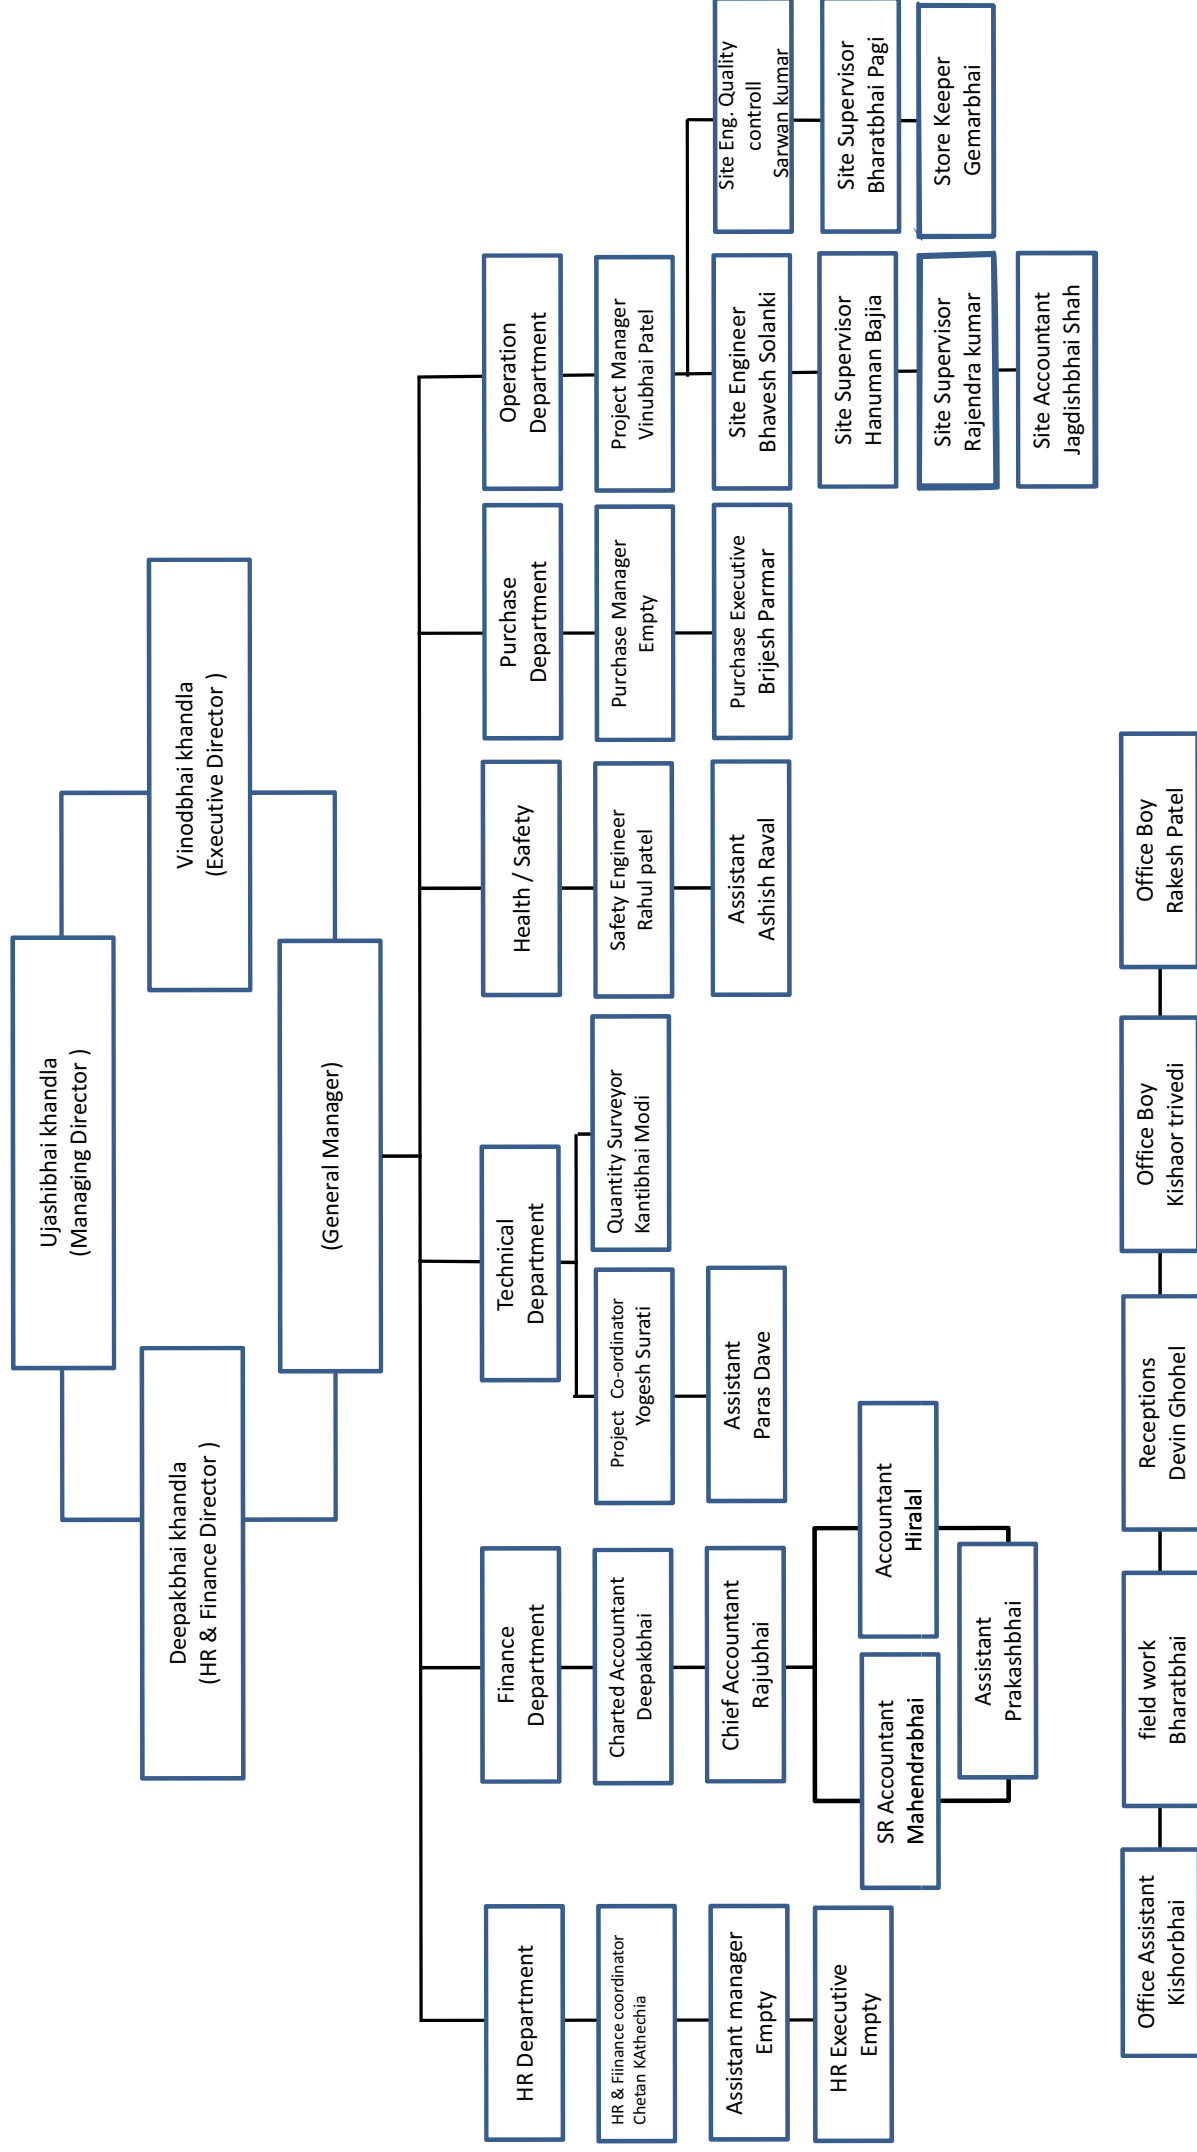

Monarch Group has always sturdily focused and successfully completed numerous civil contracts in infrastructural developments – low cost housing, bungalows, hotel and club buildings, hospital and school buildings, temple and mosque structures, etc. Our portfolio comprises of successful completion of large-scale industrial projects, power plants, heavy machinery foundations, huge capacity of overhead and underground water tanks, and small bridges and culverts. All these works have been carried out on the basis of quality controlled norms and standards. We have substantial experience in building roads and drainage projects and other high valued infrastructural development projects. Our various other projects are in the pipeline. We will also undertake projects of civil work, plumbing, heavy and light fabrications.

GOAL OF OUR TEAM

Our team consists of highly qualified and experienced civil engineers. Each team member possesses specific knowledge and expertise in construction technology and they are in pursuit of a global network for new development. The unique combination of our team adds value by introducing diverse approaches and perspectives. Our specialized team members have helped to reach the height in parallel with the commercial contractors and real estate developers in India. Everybody in our company performs on the customer support, so as to willingly and enthusiastically help our customers to remain on our construction solution as a steadfast need.

The breadth and depth of our capable and efficient staff members allows more flexibility to undertake any construction work - from evaluating one specific aspect to designing the structure and accomplishment of large-scale project. Our team is adept in delivering performance alongside our customers, promoting and contributing a constant exchange of ideas.

DIRECTORS OF THE MONARCH INDIA INFRACON PVT. LTD.

COMMERCIAL BUILDING

We would undertake a wide range of construction projects for commercial establishments and also provide commercial building contractor services. Building commercial buildings and complexes require a clear understanding of spatial and material demands; which are essential to the industry. At Monarch Group, we provide commercial building contractors and residential building contractors in this line of work and have wide experience in delivering quality structures.

LOW COST HOUSING

We would provide our expertise in the development of low cost housing projects. We understand the demanding needs of a welfare economy in the context of the developing nature of the Nation. We invest our labour resources and technical expertise, ensuring that all families and households are provided with housing units at the lowest prices. This ensures that they retain control over their existence and develop pride in their achievements. These low cost housing units are ideal for all environmental and climatic conditions.

HOTEL & CLUB BUILDING

Clubs are the quite essential meeting ground for socializing and relaxation; while hotels function as living areas for travelers & vacationers. Constructing these buildings require a clear understanding of requirements of space, lighting and acoustics. At Monarch Group, we would bring our considerable experience in real estate development to the construction of exclusive and elegantly styled hotel and club facilities.

RESIDENTIAL BUILDINGS & BUNGALOWS

We have unparalleled expertise in the design and construction of residential complexes for our customers in and around Gujarat. We have worked to develop and deliver residential facilities that are built at par with the finest standards. We have regularly benchmarked new quality standards through our perseverance and expertise. Through our sustained customer focus, we ensure that we would provide residential complexes that are developed to suit the diverse requirements of the modern lifestyle.

SCHOOL BUILDINGS

We at Monarch Group are committed to provide innovative and world-class construction standards. We have considerable experience in the construction of schools. This experience covers building, reconstruction and renovation and upgrading of school facilities that are inspiring and attractive environments for learning. We work to meet the challenges of providing a safe and secure environment for students and staff in these facilities.

TEMPLES & MOSQUE

We have completed temple construction projects in several areas in Gujarat by and large, at Limbdi, Surendranagar etc. and we have also completed the project of a Mosque in Surendranagar/Limbdi Highway.

INDUSTRIAL PROJECTS

We would undertake a huge industrial projects for their in time completion. We would provide our expertise in the industrial projects for speedy and quality construction.

POWER PLANT

The construction of energy and environmental plants such as thermal or hydraulic power stations is one of the most challenging tasks of erection and installation engineering. As a long-standing partner to the energy and environmental industry we at Ferro-Montagetchnik (FMT) have a considerable of experience in the implementation of a great variety of projects. These include new installation, servicing and maintenance as well as the modernization of boiler plants and power stations. Both plant manufacturers and owners rely on our expertise.

HOSPITALS

We at Monarch Group are committed to provide innovative and world-class constructions standards. We have considerable experience in the construction of hospitals. This experience covers building, reconstruction and renovation and upgrading of hospital facilities that are inspiring and attractive environments for treatment. We would work to meet the challenges of providing a safe and secure environment for patients and staff in these facilities.

PRECAUTIONARY MEASURES FOR SAFETY:

Our prime concern is safety and protection of our construction staff; providing accident-free environment at the construction site. We have always endeavour to implement maximum safety measures for protection. We would provide training programme to the construction staff to execute the work safely.

Our safety programme has two categories – one is prevention of accident and other is protection to accident.

1. We would provide training to the construction staff at the site in safe execution of each work. During operation none to approach the construction staff without protection, in case of urgent need. In case of any accident our trained supervisory staff will provide first aid. First Aid Kit is always available at the site.
2. We would provide our construction staff with adequate safety accessories for protection, like:
 - ⦿ Safety Helmets,
 - ⦿ Safety Belts for workers working at the height.
 - ⦿ Safety Goggles.
 - ⦿ Hand Gloves.
 - ⦿ Gum Boots.

We would maintain record of the important and emergency phone numbers and the addresses of Doctors available at the vicinity of the site office.

There is a Periodical Safety Audit; at the end of which we would convey certain important instructions to the construction staff and arrange for a group training.

For prevention and protection of accident for the safety of the workers, we would demarcate the area with broad and alert ribbon

Periodical maintenance of all the equipments and machinery is the essential part of our safety programme by our technical staff.
